## CORRUGATED PIPE TECHNICAL DATA

**Product description:** Yellow flexible polyethylene corrugated pipe Ø50 – GTDUCT-DN2025-50M

**Applications:** Protection for plastic or metallic installations (water, gas, electricity) not exposed to sunlight or subject to weather.

**Marking:** #000# GASTITE [www.gastite.co.uk](http://www.gastite.co.uk) GAS #001# GASTITE [www.gastite.co.uk](http://www.gastite.co.uk) GAS #002#.

### **Characteristics:**

- Used material: High Density Polyethylene (HDPE)
- Minimum operation temperature: -40°C
- Maximum operation temperature: 60°C
- Weight by meter: 160 g/m ± 3g/m
- Scheme in annex
- Product without halogen release
- Efficient protection
- Easy installation
- Easy to handle
- Economical

### **Dimensions and tolerances:**

External diameter: 50 mm ± 1mm

Thickness: 2,5 mm

Length of the coil pipe: 50 m with a tolerance of (0,+1)

**Storage:** The tube should be stored in covered areas and always protected from sunlight until used.
