

CORRUGATED PIPE TECHNICAL DATA

Product description: Yellow flexible polyethylene corrugated pipe Ø63 – **GTDUCT-DN3240-50M.**

Applications: Protection for plastic or metallic installations (water, gas, electricity) not exposed to sun light or subject to weather.

Marking: #000# GASTITE www.gastite.co.uk GAS #001# GASTITE www.gastite.co.uk GAS #002#

Characteristics:

- Used material: High Density Polyethylene (HDPE)
- Minimum operation temperature: -40°C
- Maximum operation temperature: 60°C
- Weight by meter: 210 g/m ± 3g/m
- Scheme in annex
- Product without halogen release
- Efficient protection
- Easy installation
- Easy to handle
- Economical

Dimensions and tolerances:

External diameter: 63 mm ± 1mm

Thickness: 2,5mm

Length of the coil pipe: 50 m with a tolerance of (0,+1)

Storage: The tube should be stored in covered areas and always protected from sunlight until used.
