FLEXIBLE SLEEVING TECHNICAL DATA – Ø63

Product description: Yellow flexible plasticized PVC ducting Ø63 – GTDUCT-DN3240-50M.

Applications: Protection for plastic or metallic installations (water, gas, electricity) not exposed to sunlight or subject to weather.

Marking: Gastite® - MADE IN THE UK – CVLLM55

Characteristics:

- Used material: plasticized and un-plasticized PVC
- Minimum operation temperature: -10°C
- Maximum operation temperature: +55°C
- Weight: 413g/m
- Efficient protection
- Easy installation
- Easy to handle
- Economical

Dimensions and tolerances:

- External diameter: 62.6mm ± 1mm
- Internal diameter: 55mm
- Max wall thickness: 7.6mm
- Length of the coil: 50M with a tolerance of ± 2%

Storage:

- The ducting should be stored in covered areas and always protected from sunlight until used.
